# EUROBRILLANCE HAS BEEN A LEADER IN CHANGE FOR YEARS

**We all have the will in our DNA to change the world**

It is up to us industrialists to propose solutions to reduce our environmental impact

**REDUCE  
REUSE  
RECYCLE**

**By incorporating environmentally friendly solutions for each of our ranges  
and by developing materials that respect a circular economy  
we build up our know-how and support our future.**

Nowhere else in our industry is there so much expertise and intelligence that focuses on next-generation materials

**When others talk about innovation,  
Eurobrillance already speaks from the present**

Don't compromise on the appearance of your packaging in your current process or the technical characteristics of your products to go green

# ZeroBact®

The new range of antibacterial coating films

eurobrilliance

## ZEROBACT® THE NEW RANGE OF ANTIBACTERIAL COATING FILMS

The ZeroBact® series was developed to achieve antibacterial properties with a constant visual quality

By removing **99% of the bacteria** that come into contact with the surface, Zerobact® solutions significantly reduce the risk of cross-contamination and help to keep the surface clean and hygienic

With an excellent level of quality and the ability to fold and emboss, these solutions do not require any process change

**Ideal for applications in the fields of pharmacy, packaging, food packaging, book covers, menus, communication tools ...**

***Does not use nano-silver technology***

***Tested and certified Standard ISO 22196: 2007 by an independent laboratory***

# ZéroPlast<sup>®</sup>

The best solution to reduce the environmental footprint of your products

eurobrillance
